Marlborough International provides access via offshore cells, which act as feeder funds into the award-winning Marlborough fund range.

This information is for Financial Professionals only and should not be relied upon by Retail Investors. Past performance is not a guide to future performance. The value of investments and the income derived from them may fall as well as rise and the investor may not get back the amount originally invested. Changes in exchange rates may cause the value of the funds to rise or fall. The European Multi-Cap, UK Micro-Cap Growth, Special Situations and Multi Cap Income funds invest in smaller companies, which carry a higher degree of risk than larger companies and may result in a volatile NAV. The UK Multi-Cap Growth, UK Micro-Cap Growth, Special Situations and Multi Cap Income funds invest mainly in the UK. Therefore they may be more vulnerable to market sentiment in that country. Some of the funds may use derivatives to protect the value of the fund assets or to reduce the costs of investing, although this may not be achieved. It is not anticipated that the use of derivatives will have any significant effect on the risk profile of the funds.

Investment in the Marlborough feeder funds can only be made on the basis of the relevant prospectuses, which are available from Marlborough International Management Limited on request or via www.marlboroughinternational.gg.
